Removal and Installation of Rear Wiper Blade

REMOVAL

Remove the wiper blade as following the procedure below (as shown No.1 to 8 in the illustration).

1. Set on
2. Pull down the blade
3. Move the blade in direction by the arrow
4. Turn the blade and remove the lever from wiper arm
5. Move the blade in direction by the arrow
6. Move the blade in direction by the arrow to reach the spring
7. Pull the end of blade in direction by the arrow
8. Set off

CAUTION:
- If the detaching force in the arrowed direction (see the illustration) is less than 68.6N (7.0kg, 15.4lb), replace rear wiper blade and rear wiper arm with new ones.
- When replacing the rear wiper blade, blow air and remove shaving of plastic or dust.
REAR WIPER AND WASHER SYSTEM

INSTALLATION
Install in the reverse order of removal.

Removal and Installation of Rear Washer Nozzle

1. Remove high-mounted stop lamp. Refer to LT-144, “High-Mounted Stop Lamp” in “LT” section.
2. Remove the rear washer nozzle mounting screw and remove it.
3. Note the following, and install in the reverse order of removal.
   - Tighten rear washer nozzle mounting screw to specified torque.
     
     Rear washer nozzle mounting screw
     
     \[0.4 \text{ N·m (0.04 kg-m, 4 in-lb)}\]

   **CAUTION:**
   - After tightened rear washer nozzle mounting screw, make sure that the rear washer nozzle does not come off when it is pulled downward at 49N (5kg, 11lb) as shown in the figure.
   - If the washer nozzle come off, replace it together with a new high-mounted stop lamp assembly.

Check Valve Inspection

- A check valve is provided in the washer fluid line. Be careful not to connect check valve to washer tube in the wrong direction.
